

Year 6 Spring Term Newsletter

Welcome back to the Spring term, this term we have lots of exciting topics we are covering.

English: We are focusing our writing around our topic of Mountains to begin the term. We will be writing diaries and discussion texts. After the half term break, we will be developing our persuasive text writing and information writing linked to a short art and design project on architecture. We will continue to practise our SAT busting skills for reading comprehension and grammar and spelling.

Maths: We are continuing to build our mathematical skills through understanding negative numbers in context, finding out what BODMAS is, beginning algebra, finding missing angles in shapes, understanding ratio and proportion and understanding and calculating the areas and perimeters of shapes. We will continue to practise our arithmetic skills and our SAT busting skills in our SAT buster books.

Practical activities to do at home: please encourage your child to tell the time regularly and look at bus and train timetables when possible as these are skills for life. Also, please encourage them to go onto **Doodle Maths** (ideally daily) as it really does boost children's understanding and confidence in Maths.

Keep practising your child's recall of their times tables.

Topic: In the first half term we are studying Mountains. If your child has visited a mountain, please encourage them to share their knowledge with the class.

After half term, we will be studying Rivers, with particular emphasis on the River Thames (as it is on our doorstep). We will be discussing flooding, so memories of the flooding in 2014 will be shared and we will welcome creative ideas for preventing flooding in our area.

We will also become architectural designers in a mini topic and hope to impress everyone with designs to improve our school.

Science: We will be looking at the human body. We will be studying the different systems within the body, the human digestive system and the circulatory system and how they work. We will also study the importance of maintaining a healthy body. In term 4 we will study all the different aspects of light, reflection, refraction, colour and how we see.

RE: In term 3 we will be studying Christianity and the beliefs about eternity – What did Jesus do to save humankind? In term 4 we will study Christianity and beliefs about the Kingdom of God – What Kind of King is Jesus?

ICT: We will be studying Data and information spreadsheets in term 3. In term 4 we will be finding out about Creating media: 3D modelling, this links very much with our topic of architecture and we are hoping to have a talk about 3d modelling from some young architects.

Upcoming Events

PE this term is on Tuesday and Friday. Please come to school dressed in PE kit.

Homework:

Spellings are set on Friday and tested on Friday.

Daily reading - please record in your child's reading record.

English homework is set on Friday and due in the following Wednesday.

Maths homework is set on Friday and due in the following Wednesday.

Please go on Doodle Maths daily.
