

Scale of two:

- Motorbike – seven and a half squares
- Bus – five squares

Scale of five:

- Car – four circles
- Van – one circle

Scale of ten:

- Car – two faces
- Motorbike – one and a half faces

Children can choose any pictogram as long as they provide a valid explanation for their choice.

Either scale could be used but, as the numbers are large and are all multiples of five, Anna's suggestion would be a more efficient way of drawing the pictogram as less symbols would need to be drawn. Half symbols could be used to represent the numbers with five ones.

Each symbol represents 5 children.

Car – 15

Walk – 20 or 25

Sooter – 30

Bike – 10 or 20

Bus – 5 or 10
